

Alcohol made **no impression.**

So we burnt it with cigarettes
and a heated pan.

Still **no impression.**

Then we attacked
it with an army of acids and
bathed it in boiling water.

Same result. At last we hired a
hitman with a knife...

Our new revolutionary benchtop for labs has been through a lot.

Just to impress you.

Chemical tests...mechanical tests...structural tests – you name it, SPF Lite passed it. But surely it takes more than that to make a laboratory benchtop revolutionary?

What if we tell you that SPF Lite weighs less than 30% of other quality laboratory benchtops? That SPF Lite is the only instantly repairable laboratory benchtop on the market? And that installation modifications – which would normally cost you dearly – can be fixed on the spot?

Still don't see a revolution coming? Then take a look at the price. In spite of all its unique qualities SPF Lite will cost you no more than a traditional quality laboratory benchtop.

Need more convincing?

These are some of the advantages of SPF Lite.

- Chemical resistant
- Impact resistant
- Scratch and wear resistant
- Fully integrated sinks
- Seamless
- Easy to install
- Easy to clean
- Hygienic
- 4-6 weeks delivery
- 5 year warranty

SPF Lite is the only **Instantly Repairable** laboratory benchtop on the market
